Journal of Electroanalytical Chemistry 462 (1999) 281–283

JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject Index of Volume 462

Adsorption
Role of surface states and adsorbates in time-resolved photocurrent measurements and photovoltage generation at phthalocyaninatozinc(II)-photocathodes, 222
Atomic force microscopy
In situ atomic force microscopy study of polypyrrole synthesis and the volume changes induced by oxidation and reduction of the polymer, 211

Carbon paste electrode
Electrode reactions and accumulation of hydrogen at carbon paste electrodes in the presence of tetrachloropalladate, 174
Catalysis
Cathodic reduction of 2-nitronaphthothiophen-4,9-quinone: evidence of catalysis by proton donors and its simulation, 195
Cathodic coupling
Cathodic synthesis of powerful electron π-donors including dithiadiazafulvalenes, 137
Chemically modified electrodes
Polyoxometalate modified electrodes: from a monolayer to multilayer structures, 187
Clay-modified electrodes
Preparation of clay-modified electrodes by electrophoretic deposition of clay films, 143
Complexing capacity
Voltammetric metal speciation in mixtures of inert and labile macromolecular complexes at any ligand-to-metal ratio: differential pulse polarographic study of the Zn(II)–nitrilotriacetate–polymethacrylate system, 157
Conducting polymers
In situ atomic force microscopy study of polypyrrole synthesis and the volume changes induced by oxidation and reduction of the polymer, 211
Copper
Electroless copper plating on a glass substrate coated with ZnO film under UV illumination, 259
Cyclic voltammetry
An in situ UV-vis and IR spectroelectrochemical study of the deposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions, 266
Cathodic reduction of 2-nitronaphthothiophen-4,9-quinone: evidence of catalysis by proton donors and its simulation, 195
Electrode reactions and accumulation of hydrogen at carbon paste electrodes in the presence of tetrachloropalladate, 174

Dichloromethane
An in situ UV-vis and IR spectroelectrochemical study of the deposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions, 266
Diclofenac
Ionic partition diagrams of ionisable drugs: pH-lipophilicity profiles, transfer mechanisms and charge effects on solvation, 235
Differential pulse polarography
Voltammetric metal speciation in mixtures of inert and labile macromolecular complexes at any ligand-to-metal ratio: differential pulse polarographic study of the Zn(II)–nitrilotriacetate–polymethacrylate system, 157
Dithiadiazafulvalene
Cathodic synthesis of powerful electron π-donors including dithiadiazafulvalenes, 137
Dithiafulvene
Cathodic synthesis of powerful electron π-donors including dithiadiazafulvalenes, 137

Electrodeposition
An in situ UV-vis and IR spectroelectrochemical study of the deposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions, 266
Electroless plating
Electroless copper plating on a glass substrate coated with ZnO film under UV illumination, 259
Electrolysis
Cathodic reduction of 2-nitronaphthothiophen-4,9-quinone: evidence of catalysis by proton donors and its simulation, 195
Electrophoretic deposition
Preparation of clay-modified electrodes by electrophoretic deposition of clay films, 143
Electropolymerisation
Sonoassisted electrooxidative polymerisation of salicylic acid: role of acoustic streaming and microjetting, 181
Electroreflectance
Frequency dependent electrolyte electroreflectance at semiconductor | electrolyte interfaces, 251

Glass substrates
Electroless copper plating on a glass substrate coated with ZnO film under UV illumination, 259
Gold electrode
Voltammetric and XPS investigations of nickel hydroxide electrochemically dispersed on gold surface electrodes, 202
Graphitized carbon
Enhancement of the electrochemical Li doping/undoping reaction rate of a graphitic material by an evaporated film of Sn, Zn or Pb, 150

Hydralazine
Ionic partition diagrams of ionisable drugs: pH-lipophilicity profiles, transfer mechanisms and charge effects on solvation, 235
Hydrogen
Electrode reactions and accumulation of hydrogen at carbon paste electrodes in the presence of tetrachloropalladate, 174
Hydroquinone
An in situ UV-vis and IR spectroelectrochemical study of the deposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions, 266

PII S0022-0728(99)00003-0

Inert complexes
Voltammetric metal speciation in mixtures of inert and labile macromolecular complexes at any ligand-to-metal ratio: differential pulse polarographic study of the Zn(II)–nitrilotriacetate–polymethacrylate system, 157
Interfacial structure
Frequency dependent electrolyte electroreflectance at semiconductor | electrolyte interfaces, 251
ITIES
Ionic partition diagrams of ionisable drugs: pH-lipophilicity profiles, transfer mechanisms and charge effects on solvation, 235

Lauric acid
Ionic partition diagrams of ionisable drugs: pH-lipophilicity profiles, transfer mechanisms and charge effects on solvation, 235
Li intercalation
Enhancement of the electrochemical Li doping/undoping reaction rate of a graphitic material by an evaporated film of Sn, Zn or Pb, 150
Lipophilicity
Ionic partition diagrams of ionisable drugs: pH-lipophilicity profiles, transfer mechanisms and charge effects on solvation, 235

Metal evaporation
Enhancement of the electrochemical Li doping/undoping reaction rate of a graphitic material by an evaporated film of Sn, Zn or Pb, 150
Metal speciation
Voltammetric metal speciation in mixtures of inert and labile macromolecular complexes at any ligand-to-metal ratio: differential pulse polarographic study of the Zn(II)–nitrilotriacetate–polymethacrylate system, 157
Methylene blue
Preparation of clay-modified electrodes by electrophoretic deposition of clay films, 143
Mixtures of ligands
Voltammetric metal speciation in mixtures of inert and labile macromolecular complexes at any ligand-to-metal ratio: differential pulse polarographic study of the Zn(II)–nitrilotriacetate–polymethacrylate system, 157
Molecular semiconductor
Role of surface states and adsorbates in time-resolved photocurrent measurements and photovoltage generation at phthalocyaninatozinc(II)-photocathodes, 222
Monolayers
Polyoxometalate modified electrodes: from a monolayer to multilayer structures, 187

Nicotine
Ionic partition diagrams of ionisable drugs: pH-lipophilicity profiles, transfer mechanisms and charge effects on solvation, 235
Nitrilotriacetate
Voltammetric metal speciation in mixtures of inert and labile macromolecular complexes at any ligand-to-metal ratio: differential pulse polarographic study of the Zn(II)–nitrilotriacetate–polymethacrylate system, 157
Nitrothiophenequinone
Cathodic reduction of 2-nitronaphthothiophen-4,9-quinone: evidence of catalysis by proton donors and its simulation, 195

Oxidative dimerization
Cathodic synthesis of powerful electron π-donors including dithiadiazafulvalenes, 137

Palladium
Electrode reactions and accumulation of hydrogen at carbon paste electrodes in the presence of tetrachloropalladate, 174
Phenylalanine
Ionic partition diagrams of ionisable drugs: pH-lipophilicity profiles, transfer mechanisms and charge effects on solvation, 235
Photoelectrochemistry
Frequency dependent electrolyte electroreflectance at semiconductor | electrolyte interfaces, 251
Role of surface states and adsorbates in time-resolved photocurrent measurements and photovoltage generation at phthalocyaninatozinc(II)-photocathodes, 222
Phthalocyaninatozinc
Role of surface states and adsorbates in time-resolved photocurrent measurements and photovoltage generation at phthalocyaninatozinc(II)-photocathodes, 222
Polymethacrylate
Voltammetric metal speciation in mixtures of inert and labile macromolecular complexes at any ligand-to-metal ratio: differential pulse polarographic study of the Zn(II)–nitrilotriacetate–polymethacrylate system, 157
Polyoxometalates
Polyoxometalate modified electrodes: from a monolayer to multilayer structures, 187
Polypyrrole
In situ atomic force microscopy study of polypyrrole synthesis and the volume changes induced by oxidation and reduction of the polymer, 211
Pt electrode
An in situ UV-vis and IR spectroelectrochemical study of the deposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions, 266
Pyridine
Ionic partition diagrams of ionisable drugs: pH-lipophilicity profiles, transfer mechanisms and charge effects on solvation, 235

Rate enhancement
Enhancement of the electrochemical Li doping/undoping reaction rate of a graphitic material by an evaporated film of Sn, Zn or Pb, 150
Reduction
Cathodic reduction of 2-nitronaphthothiophen-4,9-quinone: evidence of catalysis by proton donors and its simulation, 195

SEI
Enhancement of the electrochemical Li doping/undoping reaction rate of a graphitic material by an evaporated film of Sn, Zn or Pb, 150
Semiconductor electrode
Frequency dependent electrolyte electroreflectance at semiconductor | electrolyte interfaces, 251
Simulation
Cathodic reduction of 2-nitronaphthothiophen-4,9-quinone: evidence of catalysis by proton donors and its simulation, 195
Sonoelectrochemistry
Sonoassisted electrooxidative polymerisation of salicylic acid: role of acoustic streaming and microjetting, 181
Sonovoltammetry
Sonoassisted electrooxidative polymerisation of salicylic acid: role of acoustic streaming and microjetting, 181
Sorption
Electrode reactions and accumulation of hydrogen at carbon paste electrodes in the presence of tetrachloropalladate, 174
Spectroelectrochemistry
An in situ UV-vis and IR spectroelectrochemical study of the deposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions, 266

Surface chemistry
Role of surface states and adsorbates in time-resolved photocurrent measurements and photovoltage generation at phthalocyaninatozinc(II)-photocathodes, 222
Surface states
Role of surface states and adsorbates in time-resolved photocurrent measurements and photovoltage generation at phthalocyaninatozinc(II)-photocathodes, 222

Tetrachloropalladate
Electrode reactions and accumulation of hydrogen at carbon paste electrodes in the presence of tetrachloropalladate, 174
Thin clay films
Preparation of clay-modified electrodes by electrophoretic deposition of clay films, 143
Tris(2,2′-bipyridyl) ruthenium(II)
Preparation of clay-modified electrodes by electrophoretic deposition of clay films, 143

UV illumination
Electroless copper plating on a glass substrate coated with ZnO film under UV illumination, 259

Vinylogous TTF
Cathodic synthesis of powerful electron π-donors including dithiadiazafulvalenes, 137
Voltammetry
Voltammetric and XPS investigations of nickel hydroxide electrochemically dispersed on gold surface electrodes, 202
Voltammetric metal speciation in mixtures of inert and labile macromolecular complexes at any ligand-to-metal ratio: differential pulse polarographic study of the Zn(II)–nitrilotriacetate–polymethacrylate system, 157

X-ray photoelectron spectroscopy
Voltammetric and XPS investigations of nickel hydroxide electrochemically dispersed on gold surface electrodes, 202

Zinc
Voltammetric metal speciation in mixtures of inert and labile macromolecular complexes at any ligand-to-metal ratio: differential pulse polarographic study of the Zn(II)–nitrilotriacetate–polymethacrylate system, 157
ZnO
Electroless copper plating on a glass substrate coated with ZnO film under UV illumination, 259
